

# Creating a Gamified Event Website

Monday, December 11, 2017 3:24 PM

## Site Name: Zenmark

The passionate organizers are people from the Love Shack who are responsible for creating events

Currently, people are not motivated enough to make events or to attend them

We need a way to design a website that gamifies this and also displays the events and deals with a user system where people can register and sign in

When you host an event, you earn 10 points

When you reach a certain amount of points, you earn achievements

Website should have a leaderboard, and clear it each week

Design an admin panel to administrate these

★ **Design a mockup for design purposes**

☐ **Design logo**
